

Bronchiectasis **U**nderstanding & **R**esearch on **D**aily **E**xperiences & **N**eeds

BURDEN initiative

We are seeking to learn from adults living with Bronchiectasis (without cystic fibrosis), or their family members, in an online survey.

About the Survey

Little is known about the impact of bronchiectasis on the daily activities and emotional well-being of patients and their family members. The BURDEN initiative aims to fill this knowledge gap by conducting an online survey.

The results will be made available to help raise awareness and potentially improve understanding of bronchiectasis care.

Where?

Online, in
your web
browser

When?

At your
own con-
venience

Who?

If you are at least 18 years old with a confirmed diagnosis of Bronchiectasis (without cystic fibrosis), currently having symptoms, and experienced at least one bronchiectasis flare (exacerbation) in the past year, you can participate. If you are a family member living with and providing daily support to someone who fits the description above, we would also like to hear from you.*
